

CHRISTIAN T. LAPEÑA

BS Information Technology Graduate | Entry-Level IT Support / IT Staff Candidate

San Manuel, Pangasinan, Philippines | 0938-861-9791 | christianlapena.work@gmail.com

CAREER OBJECTIVE

Bachelor of Science in Information Technology (BSIT) graduate with hands-on experience gained through academic projects, internship, and technical laboratory activities. Knowledgeable in IT support, hardware troubleshooting, networking, system analysis and design, system testing, database management, web development, and technical documentation. Experienced in assisting system development, performing technical testing, updating websites, managing digital records, and preparing project documentation. Seeking an entry-level IT position where I can apply my technical skills, contribute to efficient IT operations, and continuously develop my knowledge in information technology.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

University of Eastern Pangasinan

Graduated: June 2026

TECHNICAL SKILLS

IT Support & Hardware Troubleshooting

- Knowledgeable in basic computer maintenance, Windows installation, software installation, system configuration, and hardware troubleshooting.
- Experienced in computer cleaning, virus scanning, basic PC setup, and hardware checking.
- Familiar with RAM configuration, operating system management, and virtual machine setup using VMware.

Networking & Infrastructure

- Experienced in IP address configuration, LAN/WLAN setup, and basic network troubleshooting through academic laboratory activities.
- Created RJ45 cables using straight-through and crossover wiring standards.
- Used Cisco Packet Tracer to design and simulate network environments involving routers, switches, computers, and internet connectivity.
- Performed basic router configuration using Cisco CLI commands.
- Troubleshot common network connectivity issues during laboratory exercises.

System Analysis & Design

- Experienced in preparing system documentation including Use Case Diagrams, Entity Relationship Diagrams (ERD), Flowcharts, Data Flow Diagrams (DFD), and system requirements.
- Knowledgeable in documenting system processes and preparing user manuals for developed applications.
- Applied system analysis and design concepts during academic projects and software development activities.

Database Management

- Knowledgeable in database creation, management, and basic database concepts using MySQL, MongoDB, Supabase, and Firebase.
- Experienced in performing CRUD (Create, Read, Update, Delete) operations for academic projects.
- Applied database concepts in system development activities.

Programming & Web Development

- Knowledge of programming fundamentals using C++, Python, C#, PHP, and JavaScript.
- Familiar with web technologies including HTML, CSS, PHP, and Laravel framework.
- Experienced in developing academic projects involving web and application development.
- Used Visual Studio Code and GitHub for programming and project activities.

System Testing & Technical Documentation

- Experienced in system testing, debugging support, feature validation, and troubleshooting during academic and internship projects.
- Skilled in preparing technical documents, reports, proposals, manuscripts, user manuals, and project portfolios.
- Capable of analyzing system issues and assisting in improving system functionality.

Data Management & Office Applications

- Proficient in Microsoft Office applications including Word, Excel, and PowerPoint.
- Experienced in data encoding, digital file organization, document management, and maintaining project records.

ACADEMIC PROJECTS

Capstone Project: CodeQuest: The Programming Adventure (2026)

Role: Developer Support, System Testing & Documentation Specialist

Technologies Used:

C#, Unity, PHP, HTML/CSS, JavaScript, Firebase

- Assisted in the development and improvement of game system features.
- Performed debugging, system testing, and feature validation to ensure proper functionality.
- Identified system issues and assisted in troubleshooting during development.
- Assisted in implementing additional game features based on project requirements.
- Collaborated with team members during system development and evaluation.
- Prepared and revised project manuscript content and formatting based on evaluator feedback.
- Contributed to system documentation including requirements and user-related documentation.

SOFTWARE DEVELOPMENT PROJECTS

Workforce Attendance and Payroll Management System (2026)

Role: Mobile Application Developer / System Developer

Project Description:

A mobile-based employee attendance and payroll management system designed to monitor employee attendance records, manage employee information, and support payroll-related processes.

Technologies Used:

- Flutter
- Dart
- Firebase Firestore
- Firebase Authentication
- Supabase Storage
- GitHub

Key Contributions:

- Developed a mobile attendance management application for employee time monitoring and record management.
- Implemented employee attendance features including time-in/time-out tracking and attendance record storage.
- Integrated Firebase Firestore for managing employee data, attendance logs, payroll information, and system records.
- Integrated Supabase Storage for employee profile image management and optimized cloud storage usage.
- Implemented authentication features to manage user access and application security.
- Developed notification features for payroll updates, announcements, and attendance-related alerts.
- Assisted in designing database structures and managing application data flow.
- Performed system testing, debugging, and feature validation to improve application reliability.
- Collaborated with team members to implement system improvements based on project requirements.

INTERNSHIP EXPERIENCE

IT Technical & Documentation Intern

Innovhub Makerspace OPC – Mapandan Pangasinan | February 2026 – May 2026

- Prepared technical documentation, project reports, proposals, manuscripts, and portfolio materials for system and website-related projects.
- Assisted in website maintenance and updates using WordPress, including content editing and basic code modifications.
- Participated in system testing activities to verify functionality and identify possible issues.
- Managed client information and project data using Microsoft Excel and Microsoft Word.
- Assisted in gathering client requirements and coordinating discussions related to proposed system applications.
- Organized digital files, documentation records, and project-related materials.
- Utilized collaboration and productivity tools such as Google Workspace, Trello, Notion, Canva, and Figma for project coordination and documentation.

WORK EXPERIENCE

SM Supermarket – Urdaneta City Pangasinan

Bagger / Frontline Staff | May 2019 - November 2019

- Delivered excellent frontline customer service to a high volume of clients daily while ensuring smooth, organized, and professional transactions.
 - Collaborated effectively with the staff and managed transactions and materials with a high level of care, responsibility, and strict accountability.
 - Provided frontline customer service by assisting customers with packing and organizing their purchases.
 - Handled assigned tasks and store materials with care, responsibility, and accountability.
 - Assisted with merchandise handling, product organization, and maintaining organized displays.
 - Followed company procedures and worked effectively with team members in a fast-paced retail environment.
-

CERTIFICATION

- National Certificate II (NC II) | TESDA (*Issued: 2019*)
 - Certificate of Completion – IT Internship | Innovhub Makerspace OPC (*Issued: May 2026*)
-

TECHNICAL TOOLS

Operating Systems & Virtualization

- Windows Operating Systems
- VMware

Networking

- Cisco Packet Tracer
- Basic Router Configuration

Programming, Development and Version Control

- Visual Studio Code
- GitHub
- Git
- Unity
- Laravel

Mobile Development

- Flutter
- Android Studio

Database & Backend

- MySQL
- MongoDB
- Supabase
- Firebase

Web & Design Tools

- WordPress
- Figma
- Canva
- Adobe XD

Productivity & Collaboration

- Microsoft Office (Word, Excel, PowerPoint)
- Google Workspace
- Trello
- Notion
